About us

“The technology you use impresses no one. The experience you create with it is everything”.

Sean Gerety's earnest words resonate intensely with the ethos of NIRAsys Infotech.

NIRAsys is a tech start-up, initiated in 2018, and we are dedicated to providing remarkable experiences to our patrons. NIRAsys Infotech is a pioneer in IT solutions and consulting services and is committed to creating a cohesive atmosphere for businesses. As a prominent player in the field, the company is devoted to delivering innovative solutions and focusing on a personalised experience, user-friendly UI/UX, and easy customization that helps businesses gain an edge in the digital field.

“Our solutions are meticulously designed to harmonise the data and turn it into actionable insights that meet the needs of our customers. NIRAsys is an architect of transformation through an array of smart offerings and solutions that are catalysing a paradigm shift in the manner safety, surveillance, administration, and contingencies are being managed in the country.”

Key Solutions

OMNIdash

The Integrated Command and Control Centre Solution that is envisaged to aggregate information from multiple applications and sensors deployed across defined locations and provide real-time visualisation and analytics in the desired manner. This solution has a robust response mechanism, an AI/ML-based analytics engine, and unified communication system, so it is a must-have for any sector that generates huge data and requires assistance in decision-making.

OMNICAD

The GIS and GPS-Integrated Emergency Response Platform designed to provide agencies with immediate, accurate, and reliable information for responding to emergencies. The architecture of OMNICAD is designed to allow the dispatcher to focus their attention on the caller, the emergency, and the response teams assigned to the incident.

OMNIAnalytics

This is a flexible Business Intelligence Solution delivering insights that any user can understand and use. From healthcare and finance to marketing, retail, and more, OMNIanalytics is a next-generation BI solution for every industry.

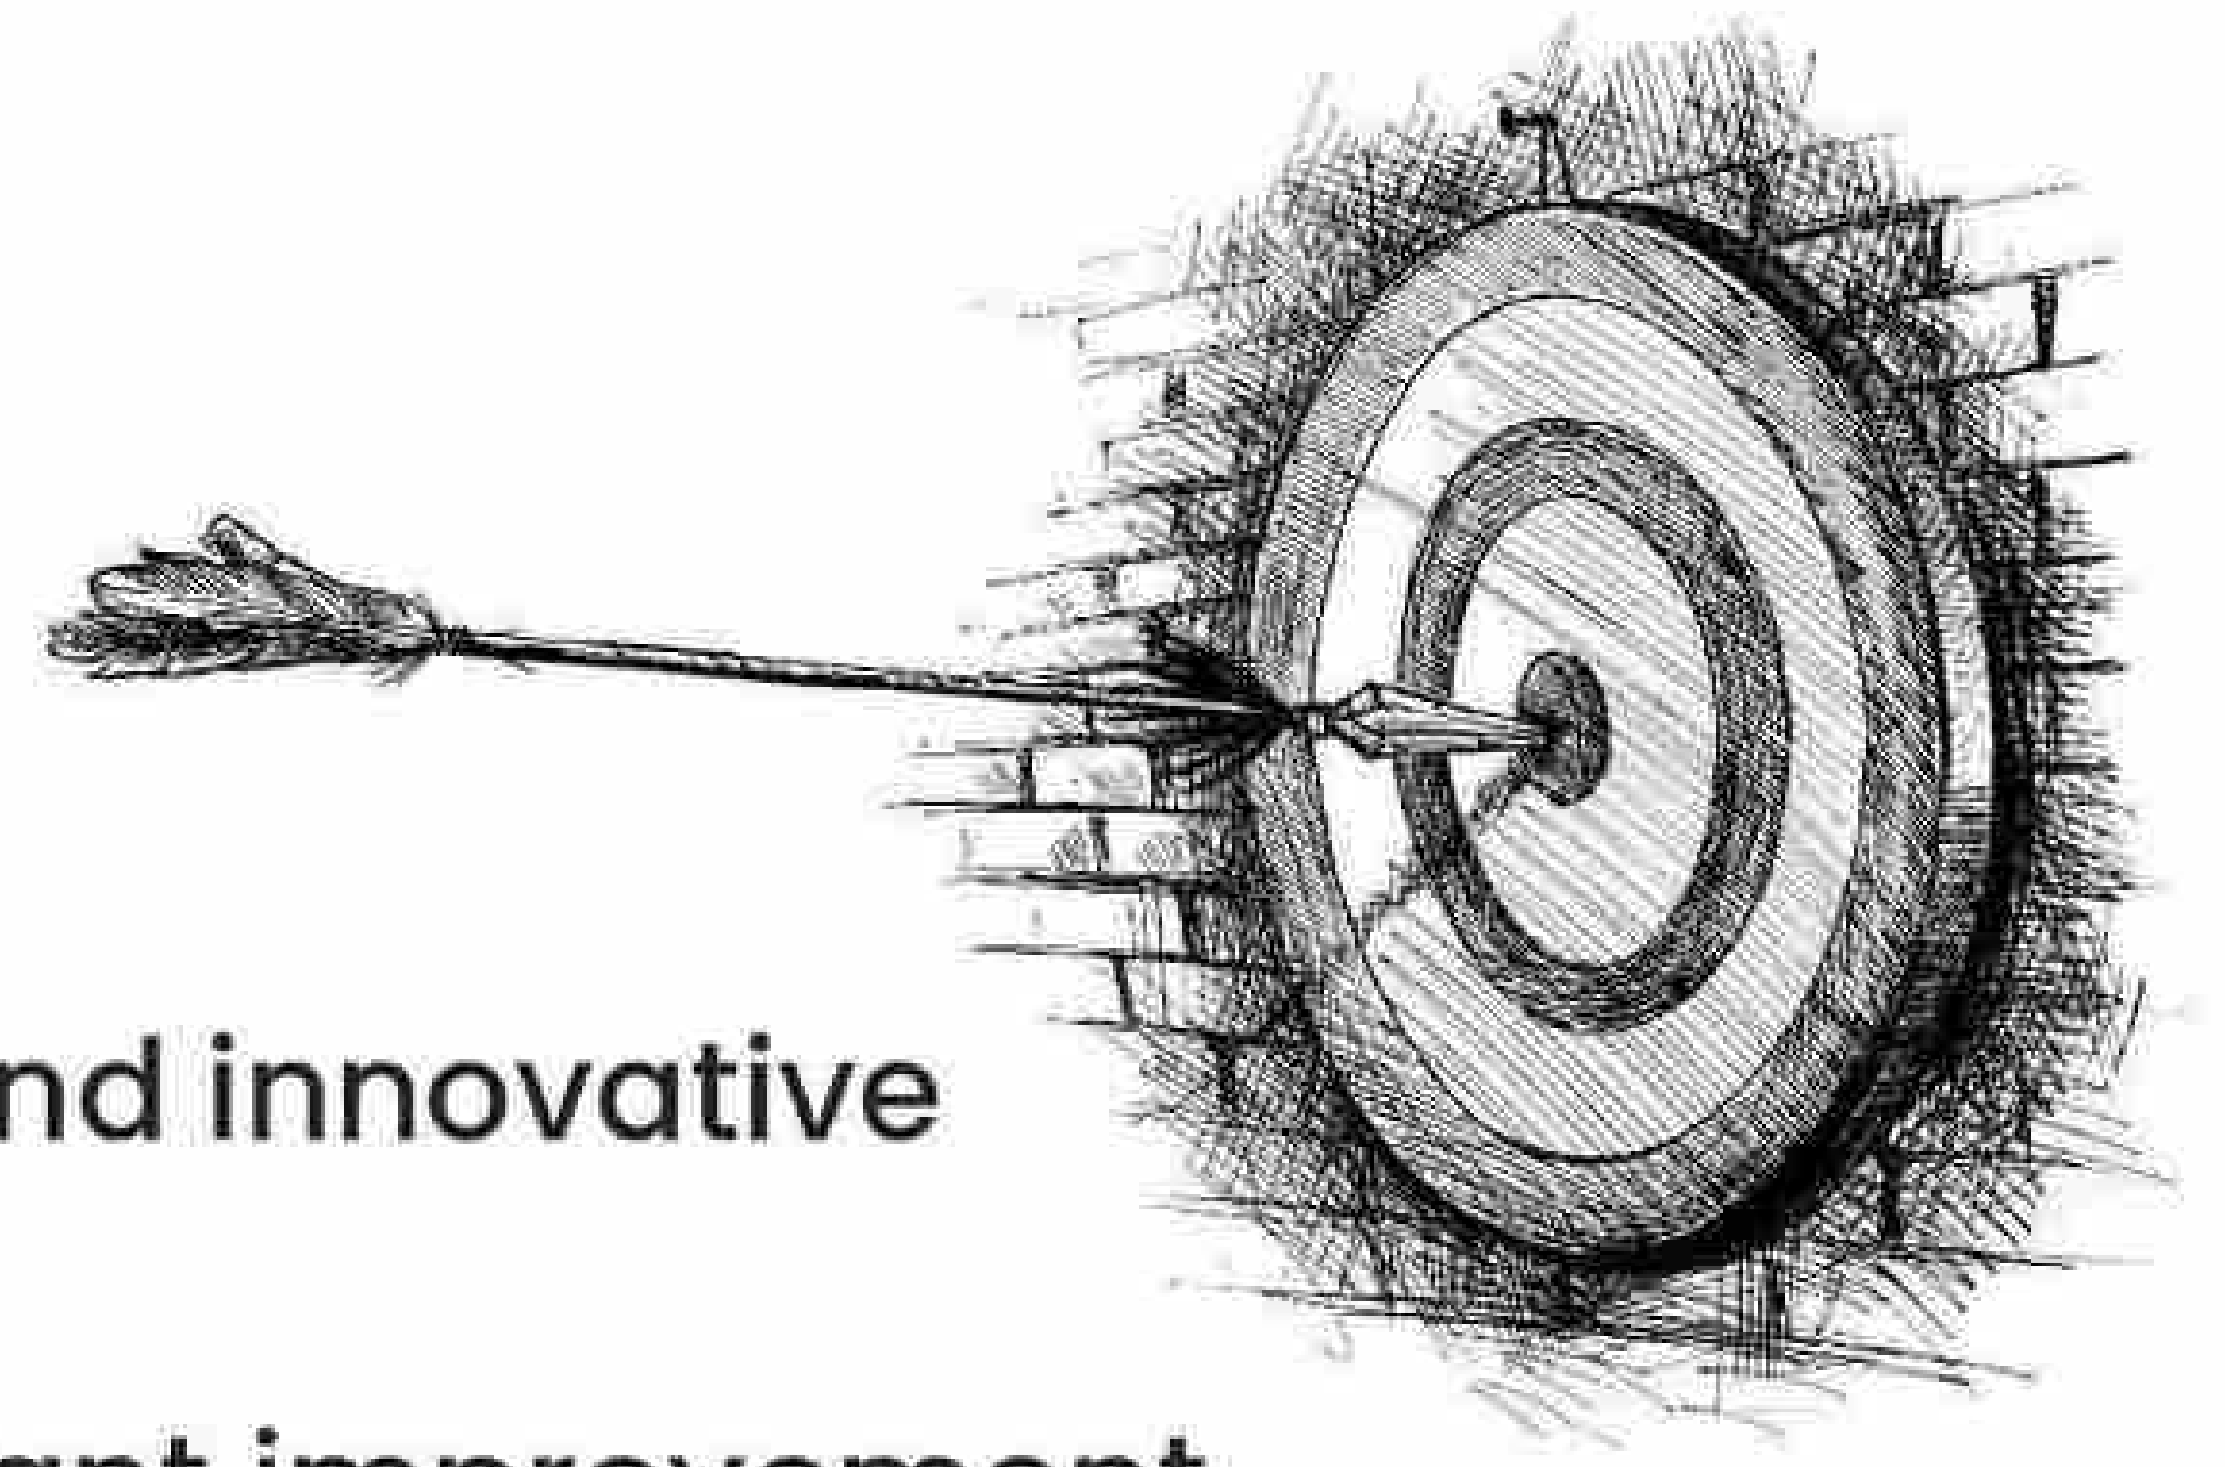

OMNISOS

This is an SOS Mobile Application that is vital in distress or emergency. It automatically generates SOS alerts and is comprehensively featured to assist with immediate support.

Mission

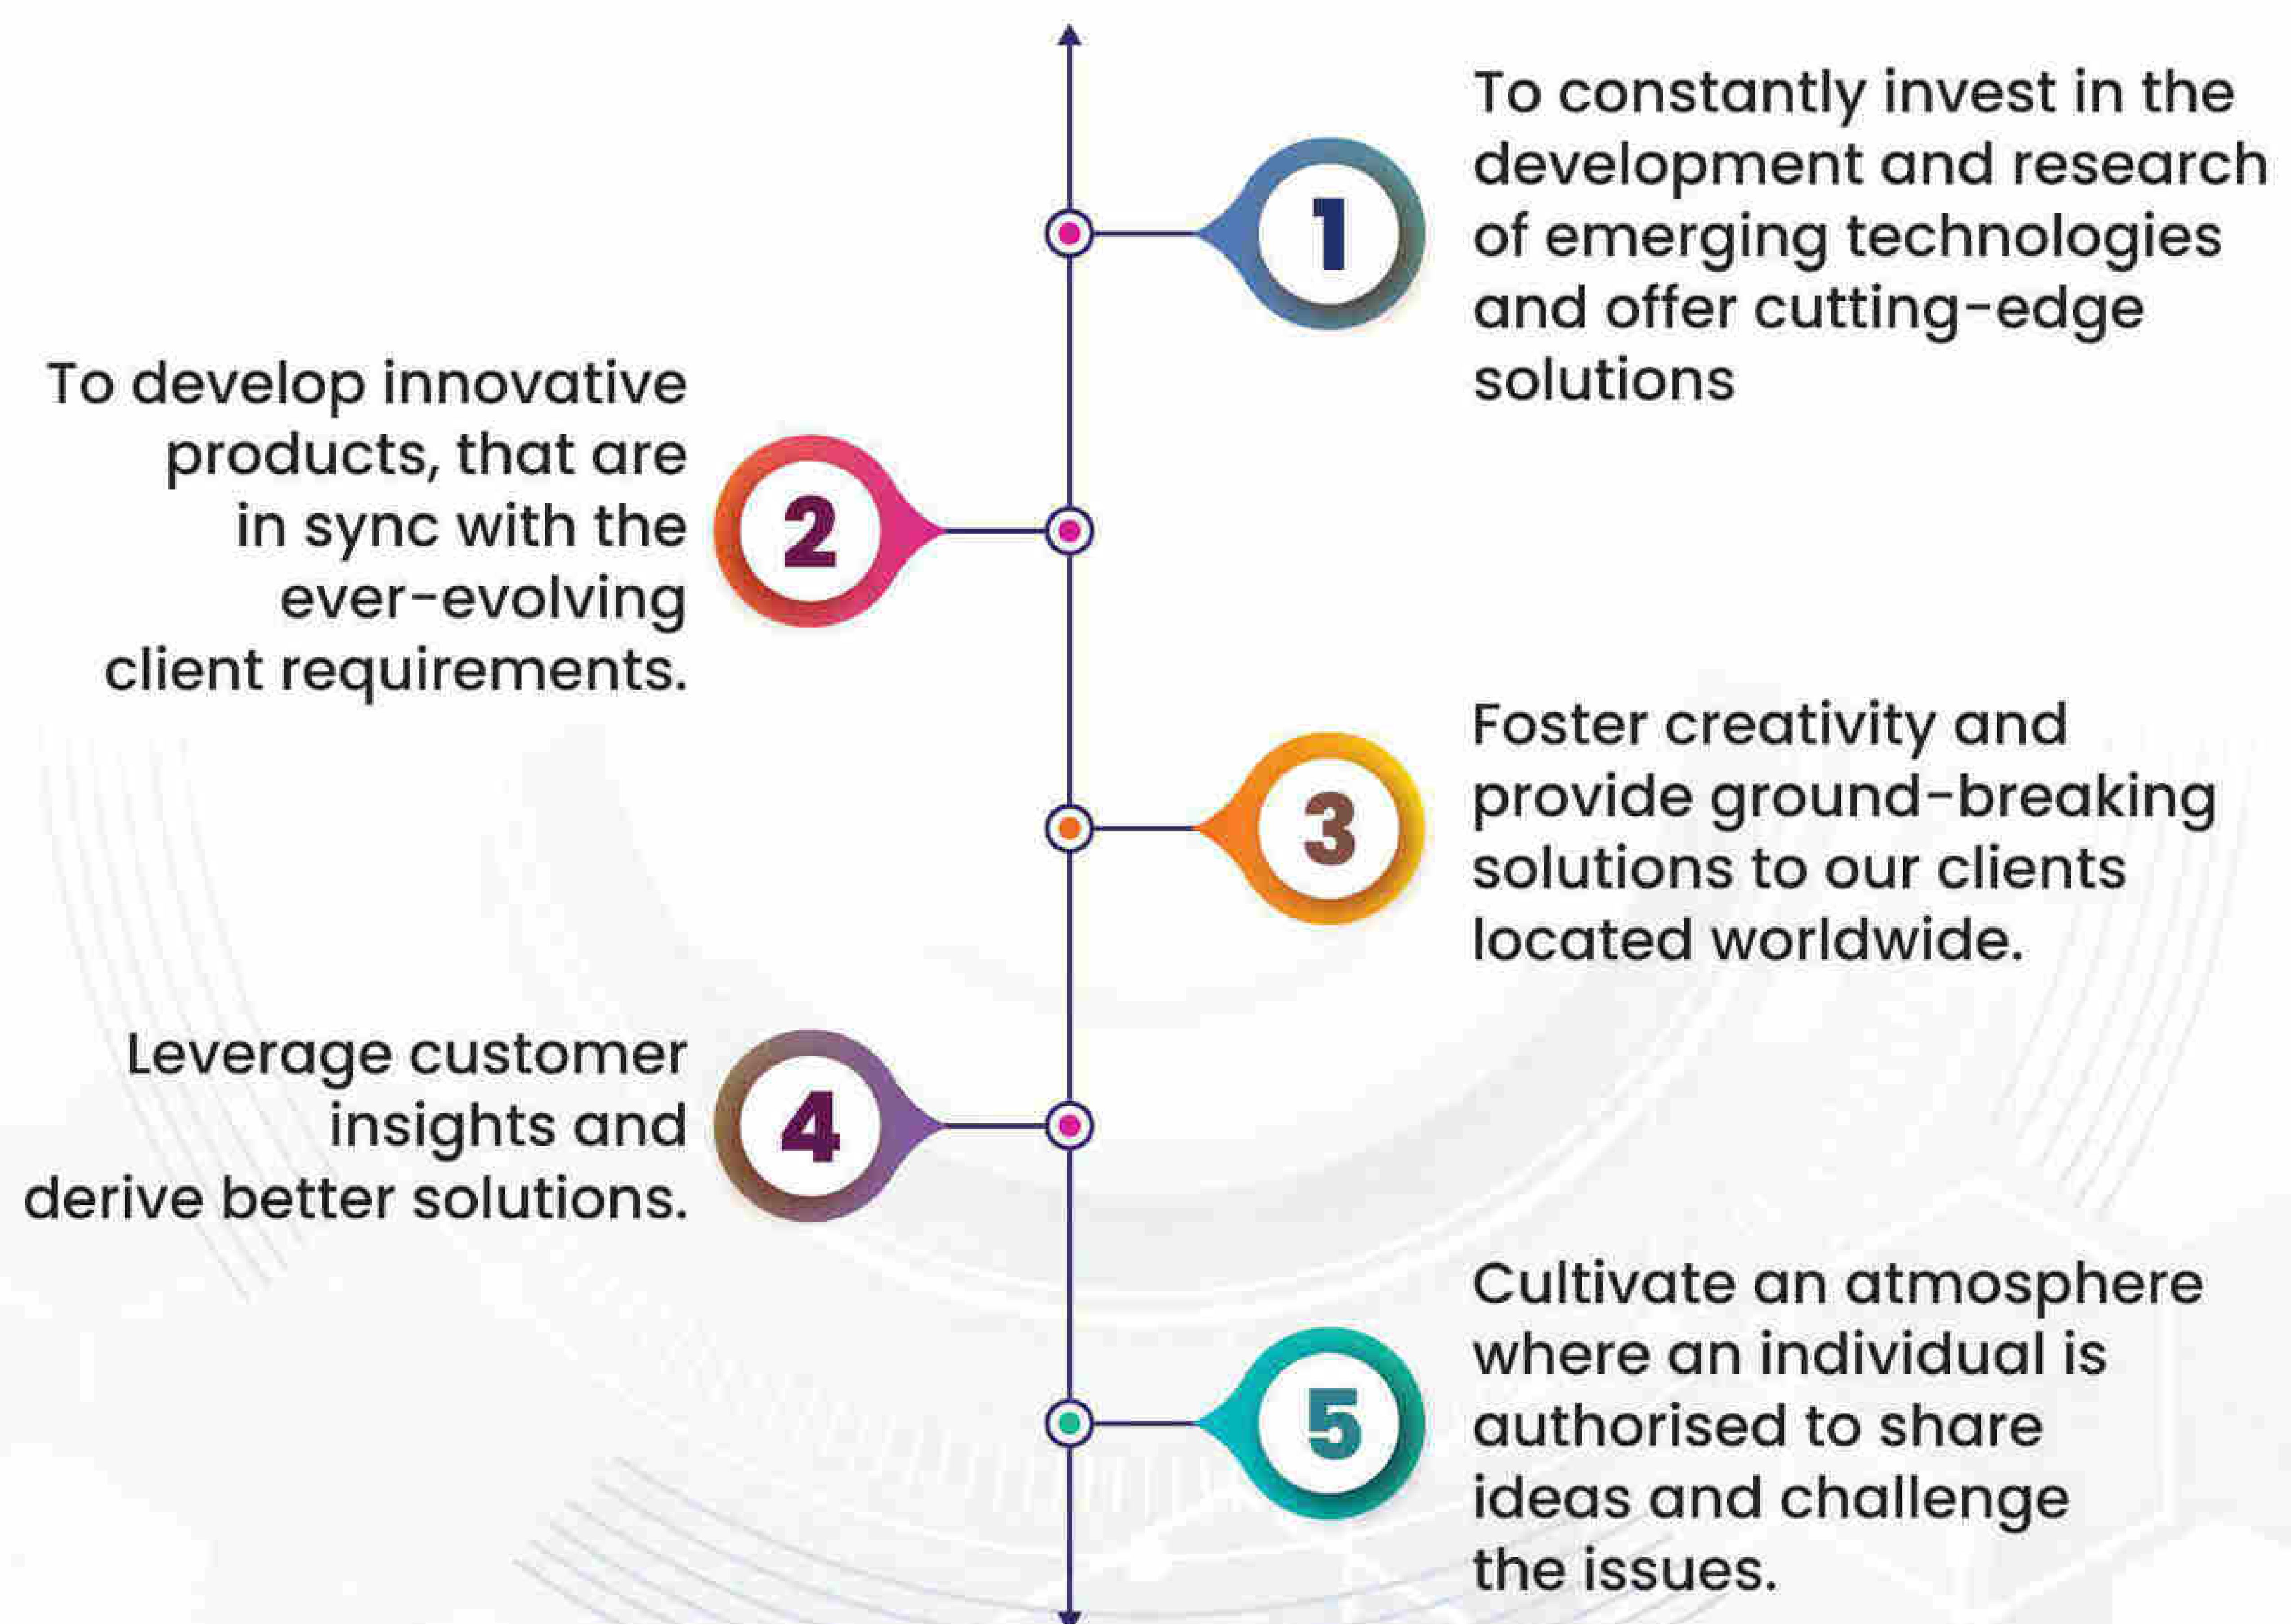

- To accredit companies with transformative and innovative technological solutions.
- To foster a culture of collaboration and constant improvement and deliver exceptional efficacy to our stakeholders and clients.

Vision

- To become a global leader in the industry, by providing customized and personalized solutions that resonates with the client-requirement.
- To empower our customers in achieving their goals easily.

Goals

Esteemed Clients

Our clients are our valued partners in progress, and we build relationships with them after developing a deep understanding of their requirements. We provide a client-centric approach and ensure that our solutions address the specific needs of every client. NIRAsys has several prestigious, and high-end clients from various sectors, and we exceed our client's expectations by keeping them ahead of the curve.
