

SUNO Mobile App Solution

Citizen Emergency App: Your smartphone is not only a tool to communicate but the invaluable way to help keep yourself safe during emergency. It's the fastest way to get a hold of loved ones in the event of any grievous situation.

SUNO is such an emergency mobile application that when a user clicks SOS button, then the Users' location will be shared to its family members and they can track the distress user to provide immediate and necessary help on the exact location.

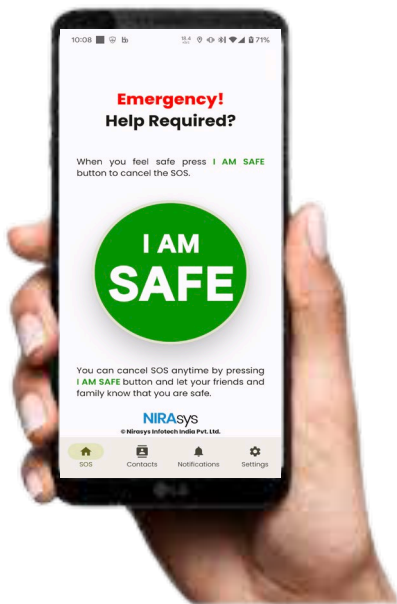

Automated SOS Alert Creation: By just clicking SOS button on the mobile application, an automated alert gets created and notification is sent to the saved family members.

SMS Notification to Family Members: Automatic SMS notification gets delivered to emergency contacts registered in application. The family member accepts the SOS notification for help and the user also gets notified.

Key Features:

- Automated SOS Alert Creation in ICC
- Front & Rear Images taken Automatically
- Audio & Video is Recorded Automatically
- GPS Location Tracking every 10 seconds
- SMS Notification to Family Members
- In-Built SOS Button
- Can View location of family member
- SOS in no internet Zone
- Can view history of generated SOS
- Available on Android Platforms

Audio & Video Recorded Automatically: Audio & video for 10 Seconds gets recorded automatically and sent to the emergency contact number/family.

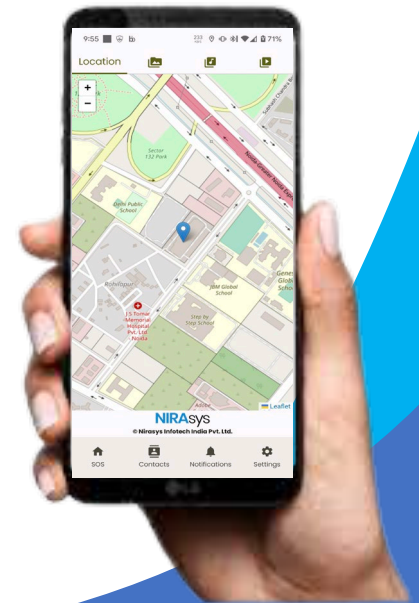

Front & Rear Images: Two images get clicked automatically each from front & rear camera and sent to the emergency contact number/family.

Continuous Image Uploading: The location information is sent at regular intervals to provide real-time GPS tracking of the user's location.

GPS Tracking: The location information is sent at regular intervals to the family member App to provide real-time GPS tracking of the user's location.

SOS in NO Internet Zone: SOS alert is generated even in NO internet zone & the notification is delivered as soon as it gets internet connectivity

Android/iOS Platforms: Get up & running in no time! SUNO App is available on Android platform & could be downloaded from Google Play Store.
